Quality brushes since 1793

What We Do

Just what is "quality"?

At **Elder & Jenks** it means we view brushmaking as a calling as much as a business. To us, brush making is an art.

E&J bristle and synthetic filament blending is a skill carried out by long-time professionals using the knowledge gathered during our 200+year history.

E&J professional tools are prized by professional painters everywhere. Our consumer tools offer the optimum price and performance in their class.

Since the quality of the finished paint job is equally dependent on the paint and the applicator, helping the customer make the best applicator selection for his or her purpose is a valuable service.
